Follow-up time (months) ^d Median [95% CI] Minimum-Maximum	17.0 [16.9, 17.2] 0.0 - 22.6	19.6 [14.4, NE] 0.0 - 20.9

^a Patients censored without adequate post-baseline evaluations or adequate baseline assessment.

^b Hazard Ratio of Lu-PSMA-617+BSC/BSoC vs. BSC/BSoC.

^c Both Cox PH model and Log-rank test are stratified for LDH (<= 260 IU/L vs. > 260 IU/L); presence of liver metastases (yes vs. no); ECOG score (0 or 1 vs. 2); and inclusion of NAAD in best supportive/standard of care at time of randomization (yes vs no). IRT data for stratification are used.

^d Follow-up time = (Date of event or censoring - randomization date + 1)/30.4375 (months) censoring for death or radiographic progression.
